Waste Analysis Report

Dealer: CEDAR BASIN CROP CONSULTING
2258 SILENT BROOK RD
DECORAH, IA 52101

Analyzed on: 04/07/2011
Sampled on: 3/29/2011

Customer: KDS
Lab I.D. : 1063487
Sample I.D. : 3

Type: Dairy Manure

Test	Results		Lb. per Ton	Lb. per 1000 Gal.
Dry Matter	27.9 %			
Moisture	72.1 %			
Nitrogen	0.260 %		5.2	
P2O5	0.224 %		4.5	
K2O	0.224 %		4.5	
Sulfur	0.06 %		1.2	
Ammonia	0.050 %		1.0	
Nitrate	0.0007 %		0.01	
Organic N	0.210 %		4.2	

Comments:

- These are reported on an as-is basis (wet weight).
- The analysis is total nutrient content. When crediting manure as a nutrient source, the nutrients are considered only partially available the first year of application because some of them are in the organic form.
- Due to the controversy over availability of manure to crops, we have discontinued providing these calculations on reports. Refer to the DNR, extension service or to the AgSource Belmond Labs agronomist for information.

Disclaimer: Due to the many factors involved in the sampling process, no warranty is made.
